

Construction and Remediation Services

The resources, stability and experience to offer a complete range of sustainable environmental solutions to the electric power industry.

Every electric power plant is different. At Waste Management, our wide-ranging solutions portfolio makes us uniquely qualified to deliver what's right. Remediation? Construction? Plant closure? Yes, we've done that.

STRENGTH AND STABILITY WITH EVERY SOLUTION:

- North America's leading provider of comprehensive waste management services
- Resources to invest in developing long-term sustainable solutions
- Inherent understanding of financial, legal and regulatory challenges
- Nationwide network of facilities, people and expertise

REMEDIATION SERVICES:

- Closure of existing CCP facilities
- Pit, pond and lagoon closure
- Plant decontamination and demolition

CONSTRUCTION SERVICES:

- Engineering, design and construction of new CCP disposal facilities
- Replacement of wet ash ponds
- Stabilization of wet ash to landfill facilities
- Development of residual facilities for dry ash

TAP INTO OUR EXPERTISE AS YOU SEE FIT:

- Turnkey outsourcing of CCP management
- Operation of facilities on a contract basis
- Development of onsite and offsite facilities
- Site selection and evaluation
- Design and permitting of facilities
